4, Explain AUTO MDIX ?

Auto-MDIX (Automatic medium-Dependent interface crossover) is a function which is inbuilt in NIC-card while manufacturing. This job is to change the data flow and allows a switch or router to automatically detect the type of cable connected and configure the port correctly.

5, Explain POE injector ?

A poe injector is a small device used when your existing switch does not support poe.

It adds power to the ethernet cable while allowing data to pass through.

6, Explain POE switch ?

A poe switch is a network switch that provides both data and power directly through its ethernet ports.

7, Explain types of nic & function ?

Types of NIC	connection	common use.
wired NIC	Ethernet cable (RJ-45)	Desktop PCs, Servers.
wireless NIC	Wi-Fi	Laptops, mobile devices
USB NIC	USB	Temporary or replacement adaptor
Fiber NIC	Fiber optic cable	Data centers, Enterprise Network.

- Functions:
- ⊗ Connect the device to a network.
 - ⊗ Sends and receives data
 - ⊗ provides a unique MAC address.
 - ⊗ converts data.
 - ⊗ supports different Network Speeds.

1, Types of mediums ?

Radio Frequency — wireless .
electrical signal — wired — copper cable
light signal — wired — fibre cable

2, Write down switch 8-pins ?

- 1 + R
- 2 - R
- 3 + T
- 4 + V
- 5 - V
- 6 - T
- 7 X
- 8 X

3, Connect utp cable between two devices
